
django-docs Documentation

Release 0.2

Evgeny Demchenko

Oct 10, 2018

Contents

1	Dependencies	3
2	Credits	5
3	Installation	7
4	Configuration	9
4.1	DOCS_ROOT (required)	9
4.2	DOCS_ACCESS (optional)	9
5	Running the tests	11
6	Running the example project	13
7	Screenshot	15
8	Indices and tables	17

CHAPTER 1

Dependencies

- Python 2.7-3.6 for Django 1.8 - 1.11
- Python 3.4-3.6 for Django 2.0 or higher

CHAPTER 2

Credits

- Project on GitHub: [littlepea/django-docs](#)
- [Documentation on Read The Docs](#)
- Maintained by [Evgeny Demchenko](#)

CHAPTER 3

Installation

1. Install *django-docs* package:

```
pip install django-docs
```

2. Add *docs* to `INSTALLED_APPS` in `settings.py`:

```
INSTALLED_APPS = (  
    ...  
    'docs',  
    ...  
)
```

3. Add *docs.urls* to `urls.py`:

```
urlpatterns = [  
    ...  
    url(r'^docs/', include('docs.urls')),  
    ...  
)
```

4. Customize configuration:

```
DOCS_ROOT = os.path.join(PROJECT_PATH, '../docs/_build/html')  
DOCS_ACCESS = 'staff'
```

4.1 DOCS_ROOT (required)

Absolute path to the root directory of html docs generated by Sphinx (just like `STATIC_ROOT` / `MEDIA_ROOT` settings).

4.2 DOCS_ACCESS (optional)

Docs access level (public by default). Possible values:

- `public` - (default) docs are visible to everyone
- `login_required` - docs are visible only to authenticated users
- `staff` - docs are visible only to staff users (`user.is_staff == True`)
- `superuser` - docs are visible only to superusers (`user.is_superuser == True`)

CHAPTER 5

Running the tests

Make sure to install *test_requirements.txt* first:

```
pip install -r test_requirements.txt
pip install -e .
```

You can run the tests with via:

```
python setup.py test
```

or:

```
python docs/tests/runtests.py
```

To run all tests against different versions of Django simply run:

```
tox
```

CHAPTER 6

Running the example project

Make sure to install *requirements.txt* first:

```
virtualenv env
. env/bin/activate
pip install -r test_requirements.txt
pip install -e .
```

You can run the example project with via:

```
cd example
python manage.py migrate
python manage.py runserver
```
